

## Important information for canister sampling

**Do not use the canister to collect explosive substances, radiological or biological agents, corrosive substances, extremely toxic substances, or any other hazardous materials.**

It's **illegal** to ship such substances, and you will be held responsible for any damages.

Always use a filter during sampling

Never pressurize the sample above **30 psi**.

Do not overtighten the valve, and do not forget to replace the brass cap

 Do not attach any label to the surface of the canister

 Never allow liquids (including water) or corrosive vapors to enter the canister

If the canister is returned in an unsatisfactory condition, you will be held responsible for any damages.

Your usual contacts remain available for any questions.
